

DISCRETE MATHEMATICS
VOLUME 156, NUMBERS 1-3, 1 SEPTEMBER 1996

CONTENTS

Perspectives

- S.J. Curran and J.A. Gallian*
Hamiltonian cycles and paths in Cayley graphs and digraphs — A survey 1

Regular Papers

- R. Balakrishnan and R. Sampathkumar*
Decompositions of regular graphs in $K_n \vee 2K_2$ 19
- M. Bauer and C. Itzykson*
Triangulations 29
- J. Chen, S.P. Kanchi and J.L. Gross*
A tight lower bound on the maximum genus of a simplicial graph 83
- H. Galeana-Sánchez*
On monochromatic paths and monochromatic cycles in edge coloured tournaments 103
- D.W. Krumme*
Reordered gossip schemes 113
- J.H. Kwak, S.-G. Kim and J. Lee*
Distributions of regular branched prime-fold coverings of surfaces 141
- M. Li*
Hamiltonian cycles in regular 3-connected claw-free graphs 171
- V.A. Liskovets*
A reductive technique for enumerating non-isomorphic planar maps 197
- I. Tomescu*
An asymptotic formula for the number of graphs having small diameter 219
- X. Zhu*
On the bounds for the ultimate independence ratio of a graph 229

Communications

- J.H.E. Cohn*
Complex D-optimal designs 237
- S. Klavžar and B. Zmazek*
On a Vizing-like conjecture for direct product graphs 243
- W. Yang*
Bell numbers and k -trees 247

Notes

- R.P. Anstee and J.R. Griggs*
An application of matching theory of edge-colourings 253
